---

EDUCATION	<b>M.Tech in Computer Science, Senior Year</b> 2016 - 2018 <a href="#">National Institute of Technology Karnataka, Surathkal, India</a> <ul style="list-style-type: none"><li>• CGPA of <b>8.91</b>/10 (June 2017)</li></ul>
	<b>B.Tech in Information Technology</b> 2009 - 2013 <a href="#">Gayatri Vidya Parishad College of Engineering for Women, Visakhapatnam, India</a> <ul style="list-style-type: none"><li>• <b>78.75%</b> (June 2013)</li></ul>
	<b>High School</b> -St. Joseph's College for Women, Visakhapatnam (CBSE) - 95.4% 2007 - 2009 <b>Secondary School</b> - Timpany Secondary School, Visakhapatnam (CBSE) - 93.8% 2006 - 2007
EXPERIENCE	<b>Summer Internship at NITK on <a href="#">Implementation of Media Independent Handover (IEEE 802.21) in ns-3</a></b> June 2017 to July 2017 Ported the partial implementation of MIH to ns-3.26 and working on the complete implementation.
	<b>Software Engineer at Tech Mahindra Ltd., Hyderabad</b> Jan 2014 to June 2016. OEM Activation is a Microsoft technology platform to support efficient and secure validation of genuine Windows as well as other Microsoft products and services. Provided Tier 2 support in OEM Activations for BizTalk server 2010 and SQL Server 2008 applications.
TECHNICAL PROFICIENCY	<b>Areas of Interest</b> - Networks, Databases, Data Structures <b>Languages</b> - C, Java, C++, C#, SQL, Python(Basic) <b>Databases</b> - SQL Server <b>Application Software</b> - ns-3, MATLAB(Basic) <b>Web development</b> - HTML, CSS, JavaScript <b>Tools/Frameworks</b> - JDBC, Servlets, JSP, SQLplus, Git, Weka, ADO.NET, ASP.NET
PROJECTS	All projects available on git : <a href="https://github.com/SusannaRuth">https://github.com/SusannaRuth</a> <ul style="list-style-type: none"><li>• <b><a href="#">Implementation of Checksum in NAT(Network Address Translator)</a></b> : NAT overcomes the problem of IP address depletion by maintaining a mapping of local IP and port tuples to globally unique IP and port tuples. NAT has already been implemented in ns-3 as a GSOC project. This project added the checksum for NAT which recalculates the checksum for IP and TCP/UDP headers after they are modified by NAT.</li><li>• <b><a href="#">Implementation of Fair Random Early Drop in ns-3</a></b> : FRED is an active queue management algorithm that uses per-flow information to handle different types of flows in a fairer manner than RED.</li><li>• <b><a href="#">Implementation of ELN (Explicit Loss Notification(Ongoing))</a></b> : Implementing ELN in ns-3 which provides a mechanism by which a TCP sender can be informed when a loss happens due to reasons unrelated to network congestion(such as wireless bit errors or collisions).</li><li>• <b><a href="#">Implementation of Modified Decision Based Median Filter for Impulse Noise Removal</a></b> : Implemented a modified decision based median filter to remove impulse noise from corrupted images which gives a better performance than median filter. Also extended it by implementing a non local median filter based on the concept of non local means.</li></ul>
ACHIEVEMENTS AND AWARDS	<ul style="list-style-type: none"><li>• Received Pat on Back Award for being the overall batch topper while undergoing the Elite training at Tech Mahindra.</li><li>• Our team in Tech Mahindra received the Best Team Award for two consecutive years due to teamwork and focus on delivery excellence.</li><li>• Was presented a Certificate of Excellence by Dr. D. Purandeswari at the event The Engineering Champions 2012 for being the class topper in B.Tech.</li></ul>
